

Thank you for purchasing and downloading the

Discussion Digital Cards.

The presentation can be used to share in remote sessions via Zoom / Teams etc. by screen sharing, for others to have access to click on the cards they would need to be hosts/co-hosts, sorry we do not offer support on remote access.

The handout can be used to make notes.

The presentation is designed to be used on a PC & Mac within PowerPoint 2016. It has been tested on an iPad and iPhone and does work with some limitations, the transition of the cards once clicked on does not work, so the cards do not disappear, this can be resolved by working across the cards from left to right, line by line, however if you do click on a card previously answered, the answer remains as an indication that the question has been answered.

You may be asked to enter a password to modify, the file is read only and modifications cannot be made, please click read only and continue.

We hope the presentation will be useful in delivering lessons/ sessions, feel free to send use any feedback and look out for our other resources currently in the process of being transferred to a digital version too.
